DETAILED ACTION

Claim Objections

1. Claims 27-42 are objected to because of the following informalities: claims 27-42 are improperly numbered. Renumbering is needed and the examiner treating claim 27 as claim 28 and so forth. Appropriate correction is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 30-36 drawn to assigning a traffic channel to the MS, classified in class 455, subclass 453.
- II. Claims 12-29, 37-43 drawn to signaling the MS to transition to at least one operational mode, classified in class 455, subclass 515.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as assigning a traffic channel to the MS does not require transitioning the MS to at least one operational mode. See MPEP § 806.05(d).

2. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
